## Executive Dashboards

Most transportation leaders manage large amounts of disparate data in order to track and analyze their transportation spend. enVista's proprietary web-based myShipINFO™ solution provides enhanced visibility to transportation expenses using graphs that are easy to use and understand. The electronic Executive Dashboard gives leaders the power to view all transportation Key Performance Indicators (KPI's) from a single source across the enterprise, enabling optimal decision-making and transportation management.

### Dynamic Business Intelligence

enVista developed its myShipINFO™ solution to provide clients full visibility to their transportation spend. Available 24/7, the web-based dashboard automatically populates client shipment data from carrier invoices. Customizable dashboards provide clients with at-a-glance graphical reports and trend analysis, based on the key performance indicators (KPI's) that matter most to their business.

Convenient access to accurate transportation data within a single portal enables enVista clients to perform critical analysis and decision-making around one of the largest sources of business expense. enVista also stores 24-months of client data that is readily available to help clients research and benchmark against current shipping requirements. All of these measures provide powerful Business Intelligence that ultimately impacts the bottom line.

*"American Musical Supply began partnering with enVista nearly four years ago based on the strength of their cost recovery system and the reporting capabilities of myShipINFO®, but it is the reliability of their service that has truly stood out."*

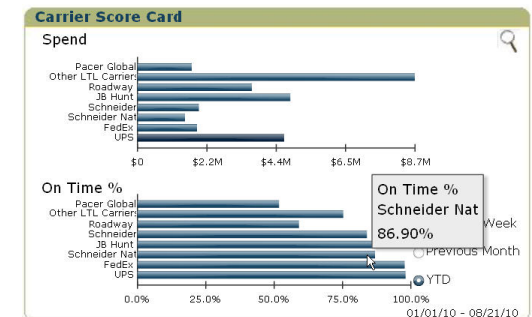

**Anthony Sutera, Logistics Manager**  
– American Musical Supply

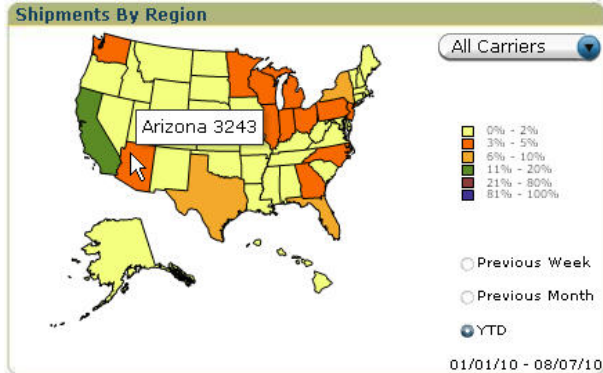

### Executive Dashboard

enVista's myShipINFO™ Executive Dashboard enables clients to not only view their small parcel spend, but also their LTL, FTL, ocean and air expenses. Transportation managers and executives are able to compare and contrast data by carrier or by service level over a wide variety of date ranges.

Executive dashboards are customized by client to report on high-level data, including:

- Carrier Metrics
- Annual Summary
- Net Spend
- enVista Recovery
- Personalized Dashboards to your Specifications

Comprised of multiple interactive, user-defined 'dashlettes,' enVista's Executive Dashboard uses simple 'drag and drop' functionality, allowing clients to mix and match the graphs they need, including:

- Carrier Metrics Scorecard
- Service Level Usage and Performance
- Shipments by Region
- Net Spend Over Time
- Annual Spend Summary by Mode
- 13-Month Recovery
- Cost per Pound
- Cost per CWT
- Accessorial Charges Over Time
- Spend by Month
- Credit Recovery
- Net Spend vs. Budget
- Exceptions
- Cost per Package
- Cost per Shipment
- Credit Recovery by Service Level
- Service Level KPI's

### Real Results

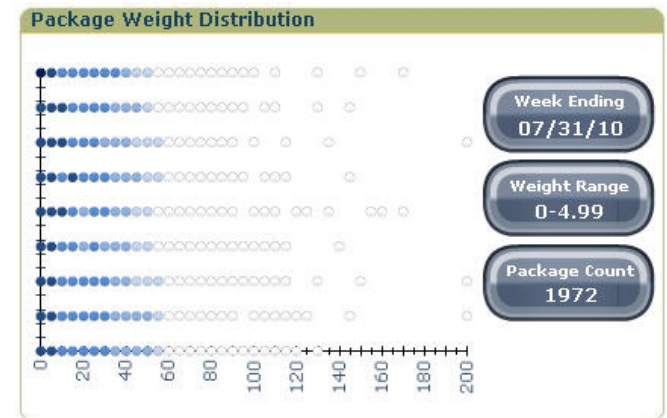

Many companies are achieving the competitive advantage and quantifiable savings using myShipINFO™. Web-based tracking provides an immediate, accurate snapshot to transportation financials and carrier service levels, empowering transportation leaders and business executives. enVista clients achieve 5-15% annual savings through myShipINFO™ Business Intelligence.

### Valuable Solutions

myShipINFO™'s Executive Dashboard provides clients:

- The ability to view shipping spend and trends at-a-glance
- Graphical representation of key transportation metrics
- The capacity to monitor shipping trends without sifting through large amounts of data, reducing the time and cost associated with internal analysis
- The opportunity to identify anomalies and monitor improvement efforts
- Determine actual carrier performance across all carriers to determine the best carrier mix and negotiate improved service levels
- Personalized Dashboard pages that display critical client KPIs
- Charts that can be used in presentations, or for improving internal policies and procedures

enVista consultants bring decades of experience and unrivaled expertise in helping clients achieve maximum transportation savings. enVista's executive dashboard enables clients to gain visibility and control over their shipping expenses, and make data-driven decisions that reduce transportation spend.
