ERP & Supply Chain Management Expertise

enVista is a Microsoft Dynamics AX solution value-added reseller and a leading enterprise and supply chain management services provider. Our extensive ERP and supply chain expertise and more than a decade of sales and technical experience with Microsoft Dynamics AX products set us apart in the industry, and enable us to uniquely address ERP and supply chain management opportunities across the enterprise.

As a certified Microsoft Dynamics AX partner, enVista works with clients from solution justification through implementation and beyond to ensure business process, human capital and technology objectives are achieved. Our expert professional services and technical teams tailor the Microsoft Dynamics AX solution to meet your business enterprise needs.

We combine best practices and our proven enABLE™ methodology to design manufacturing, multichannel retail and distribution solutions that meet our clients' specific, long-term business, industry and technology requirements. A successful solution implementation does not end the business relationship; it is just the beginning of our partnership. enVista continues to track and monitor results, make modifications, and educate and empower client teams.

Microsoft Dynamics AX Functionality

Microsoft Dynamics AX is powerful, comprehensive ERP platform that supports operational efficiency in all key functional areas, including:

• Financial management
• Business intelligence and reporting
• Manufacturing, production and quality
• Sales order management and allocation
• Sales and Marketing
• Procurement and sourcing
• Supply chain planning and execution
• Project, service and warranty management
• Human capital management
• Global risk and compliance
• Environmental sustainability
• Multi-company, multi-language, multi-currency capabilities

Gain more value faster with a single, comprehensive ERP platform that supports industry-specific and operational demands across your global enterprise.

• Multiple, purpose-built industry and operational capabilities in one solution
• **Global solution** that includes business management support for global operations

• **Ad hoc reports and streamlined workflows** with a Microsoft Dynamics AX tailored user interface

Expand business opportunities, modify processes, and differentiate your business with comprehensive ERP platform that provides unprecedented agility.

• **Natural modeling** to continuously plan, visualize, and change your processes
• **Flexible deployment options** that can change as you grow
• **Agile technology** that makes it easy to change and differentiate your business

Drive user involvement and innovation with a business management solution that is simple to use, deploy, and manage—and deliver easy access to data and processes.

• **Empower employees to innovate** with ready access to information and business processes
• **Integrated, self-service collaboration capabilities** for employees, customers, suppliers, and partners
• **Application and product life-cycle management** to streamline IT processes from initial deployment through continuing change
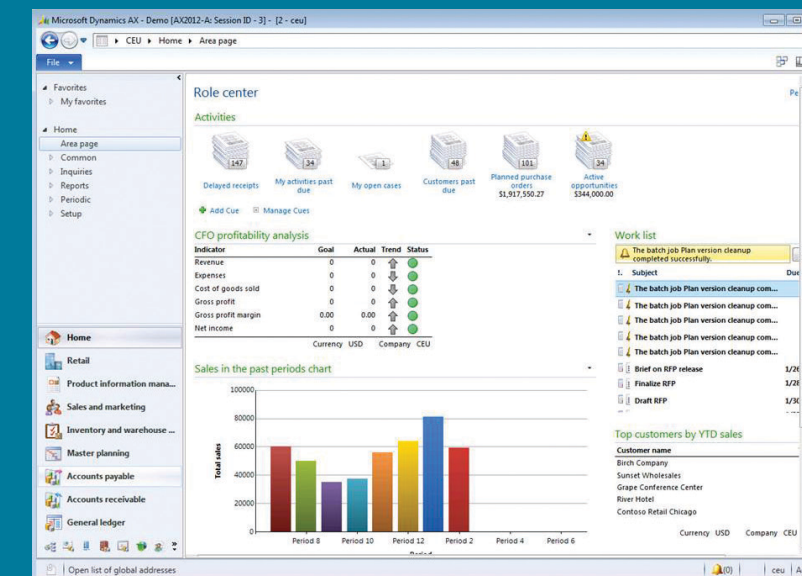

enVista Microsoft Dynamics AX Service Offerings

• ERP Justification
• ERP Implementation
• CRM Implementation
• ERP Process and Best Practices Documentation
• Cloud Computing Services & Managed Services
• LEAN Manufacturing and Distribution Best Practices
• Dynamics AX Audits and Upgrades

Microsoft has invested millions of dollars to understand the social dynamics of the user experience. At the end of the day, what makes a successful implementation is exactly that – the user experience

Benefits/Value

Microsoft Dynamics AX provides faster business value; enables agility and visibility; and helps drive faster adoption, broader usage and easier maintenance and upgrades through a continued emphasis on simplicity.

enVista's ability to lead with unrivaled supply chain and operational expertise offers clients rich opportunities for supply chain and ERP cost savings. It also differentiates us from existing Dynamics AX partners who specialize only in product functionality rather than completely integrated solutions. Partnering with a single firm with the skills and resources to develop and implement your supply chain technology strategy is not only convenient, but it will also help you get the most from your Microsoft Dynamics AX investment.

Flexible deployment options

enVista offers deployment options for Microsoft Dynamics AX that are tailored to your unique enterprise business needs of today, with flexibility for the future.

• Deploy on-premises or with cloud based Software-as-a-Service (SaaS) options that may reduce your upfront investment.

• Implement your solution all at once, or in phases according to your needs.

• Microsoft Dynamics AX is highly scalable and compatible with the technology you already use, so that it delivers long-term value without high costs down the road.

Direct Benefits
• Improved demand planning and forecasting
• Optimized inventory/product mix
• Better cost control and lower inventory carrying costs
• Improved order to cash cycle
• Simplified compliance

Indirect Benefits
• Improved customer service
• Visibility across the enterprise
• Agility to manage growth and change
• Improved profitability
